

Managing your prescriptions through the HWC

- The HWC provides medication prescribing and dispensing.
- **All patients must schedule an appointment at the HWC and establish a relationship with the onsite provider prior to having prescriptions filled for the first time. This is standard protocol when a new provider is involved.**
- Medication refills will be addressed as patients come in for appointments.
- The HWC provides an extensive list of medications available to patients at no cost. However, there may be some medications that cannot be filled onsite. Please consult with the HWC staff regarding your needs.

Please let us know if you have any questions. Thank you for your patience and understanding.
